RE: Kansas SFY 2010 Playground Surface/ Waste Tire Product Grant Program

Certification of Installation

Organizations receiving over \$10,000 in grant funding submitted a construction quality assurance proposal with the grant application, which identified a quality officer and the qualifications of that person. The quality officer must complete this certification before final payment will be released.

listed by nam	ved and installed match the waste-tire derived product that is e in the grant application or in any KDHE approved or reallocations.
depth require	the playground surfacing material conforms to the minimum ed for the fall protection for the height of my playground equipment in the ASTM1292 test provided by the manufacturer.
Playground S minimum of n This waste-tire deri	onsumer Product Safety Commission guidelines for Public Safety (Publication 325), including the recommendation for a ine inches when using loose fill rubber for playground surfacing. ved product is installed according to the manufacturer's and installation guidelines.
,with,	was onsite during all construction activities
certify with my initials that each	of the above statements are true.

Permitting and Regulatory Considerations

- The product manufacturer, not KDHE will be responsible for all warranty claims.
- The product supplier, not KDHE will be responsible for any installation training or guidance to warn users of any hazards, product storage or installation pitfalls.
- Installations of uncoated, all-black playground surface material will be required to have signage to warn users of the hazards (heat conditions and loose or dirty particles).
